

PROTECTOSEAL®

The highest quality and most comprehensive line of safety products for storing, handling, dispensing and disposal of flammable liquids.

SAFETY STORAGE CABINETS

Provide the best possible protection for all your flammable liquid applications.

High-quality Safety Storage Cabinets are available in a range of sizes to handle flammable liquid capacities from 2 gallons to 60 gallons. They are ideal for production lines, laboratory or hospital use in a variety of models including mini styles to fit limited space, bench or counter height models with "recessed toe". Meet or exceed NFPA and OSHA criteria. FM Approvals available on most sizes. Features include:

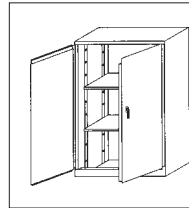

- Dependable spark-proof, tamper-proof, 3-point closure is lockable to prevent unauthorized access.
- Patented, self-closing doors (optional) with exclusive self-latching feature prevent accidental exposure to fire.
- 18-gauge steel, "Z"-bar reinforced double-wall construction with a full 1½" air space between inner and outer walls.
- Continuous door hinge for maximum ease and reliability.
- Five-point shelf support at 1½" intervals provides maximum flexibility - shelves are easily removed for convenient cleaning.
- Built-in connector for grounding cable.
- Liquid-tight 2" bottom well catches leakage and spillage.
- Wobble-free base on four leveling feet.

Door Configurations

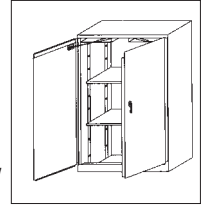

Manual Closing

- Available in single or 2-door styles depending on the capacity of the cabinet.
- Three-point closure w/ lock and keys provide reliable opening and closing of doors.

Self-Closing

- Available in single or 2-door styles depending on the capacity of the cabinet.
- Doors close automatically after each use, rate may be adjusted to provide gentle, automatic closure from 15 seconds to 2 minutes.
- Fusible link assembly on select self-closing models holds the doors open temporarily during use.
